METHOD AND SYSTEM FOR PROVIDING COMPUTER MALWARE NAMES FROM MULTIPLE ANTI-VIRUS SCANNERS

ABSTRACT

A method, system, and computer program product that provides multiple names of a given malware in a quick and automated fashion. A method of providing names of computer malwares comprises the steps of receiving a

5 sample of a computer malware, scanning the computer malware using a plurality of anti-virus scanners, at least some of the anti-virus scanners generating information identifying the computer malware, and compiling the generated information identifying the computer malware. The information identifying the computer malware may
